

Doherty Drive Pathway

Project Number: 709

LOCATION

Doherty Drive between Magnolia Avenue and Riviera Circle West (Larkspur)

COST

\$800,000 (Estimated)

FUNDING SOURCE

NTPP \$800,000

COMPLETION SCHEDULE

Fall, 2012 (Estimated)

PROJECT DESCRIPTION

This project will provide a Class I path along the south side of Doherty Drive to connect Magnolia Avenue and downtown Larkspur with three schools (of approximately 2,100 students total) and residential neighborhoods. A bridge over Baltimore Creek is included in the project.

POINTS OF INTEREST

The path will provide safe access along Doherty Drive, a heavily traveled roadway, to Hall Middle School, Redwood High School, Tamiscal Continuation School, and Piper Park. It will also improve access to downtown for residents of the Riviera and Larkspur Boardwalk, as well as future development of the Niven site. Construction was originally planned during the summer months while the schools were not in session but due to environmental restrictions construction will occur during the fall.

STATUS

The project will be re-bid and will be constructed during the fall of 2012.

Revision Date: 10/11

The multi-use pathway will provide an improved connection between downtown, Redwood High School, and the Riviera neighborhood.

It will replace the narrow sidewalk now in place.

For questions, please contact Hamid Shamsapour, Larkspur Department of Public Works, hshamsapour@ci.larkspur.ca.us or 415-927-5017.
